*The Journal of Clinical Investigation*, Volume 90, No. 1, July 1992.

Page 230.

The text in the right hand column, lines 29–32, should read:

The resulting interface was collected and washed twice in decreasingly hypertonic medium (1.134 g and 1.043 g total Na<sup>+</sup> per 100 ml RPMI-5% FCS) before a final wash in isotonic RPMI-5% FCS (20).
